

TARGET

Methionine

Key Points:

- ✓ An essential amino acid

Product Description

Methionine is an essential amino acid and is known to be the first limiting amino acid in poultry. It has properties of:

- Supporting muscle mass and feather development
- Helping to improve egg production
- Involved in the development of the digestive tract and growth performance

Physical Properties

Appearance: White to yellowish crystalline powder.

Nutritional Matrix

Methionine content	99.0%
Digestibility	100.0%
Crude Protein (N x 6.25)	58.1%

General Specifications

Bulk density	700kg / m ³ ± 10%
Angle of repose	40° ± 10%
Part.size distribution	min. 90% 0-1000µm
Solubility	approx. 30g/L water at 20°
