

TARGET

LIQUID YOLK ENHANCER

Key Points:

- ✓ Contains manufactured pigments to support yolk colour.
- ✓ Useful during times of stress & disease in poultry.

Product Description

Target Feeds Liquid Yolk Enhancer contains manufactured pigments to support yolk colour. Designed as a weekly booster or when there is a decline in yolk colour, the highly efficient enhancers, Carophyll Yellow and Lucantin Red, allow support towards a healthy orange yolk.

Useful when there is a lack of naturally occurring carotenoids within the diet, or during times of stress and disease when the birds water consumption is greater than its dietary intake. The enhancers can also be suitable for broilers when searching for a desirable skin colour.

To be added to drinking water at a ratio of 20ml per litre of water to ensure maximum dosage. Each 20ml of yolk enhancer contains 200mg of Carophyll Yellow and 200mg of Lucantin Red, both known to supply a desirable yolk colour. Also suitable for broilers to help towards a sufficient skin colour.

Dosage Rate:

For maintenance dosage- 20ml of enhancer into fresh water once a week to ensure optimum pigmentation.

For targeted dosage- 20ml of enhancer when necessary.

Composition

Deionized Water, Carophyll Yellow, Lucantin Red

Pigments

Citranaxanthin (E1611) 500mg/L

Ethyl ester of beta-apo-8-carotenoic acid (E1601) 500mg/L
