

TARGET BAITS

SALMON MEAL

Key Points:

- ✓ 66% protein

Product Description

A versatile bait, Salmon Meal contains 66% protein and 8% oil making this fish-meal an excellent choice for any fish-meal bait with high protein digestibility. Salmon Meal can be used in mixes at 450g per Kg.

Indirect steam dried fishmeal, processed from predominantly salmon trimmings but may include whole salmon, all sourced as by-product from the human food industry. This fishmeal will contain other fish species such as haddock, cod, mackerel and herring and due to seasonal variations may contain blue whiting, sprat and sand eel.

Country of Origin: Scotland

Physical Properties

Colour: Light to Medium Brown

Texture: Fine free-flowing granular powder.

Uniformity: Each lot should be as uniform as possible relative to colour, composition and texture.

Chemical and Microbiological Properties

Property	Minimum	Typical	Maximum
